SW-0211-01 was taken by Matt on 02/11. It was basically the free product . SW-0213-01 was taken inside the boom area of the canal next to where the breach in the containment area was. SW-0213-02 was taken upstream at the next door asphalt plant. SG-0212-01 was taken in the area outside of the containment where the breach occurred. SG-0212-02 was taken near the manhole in the secondary containment area closest to the entrance. I have them GPSed and will work on getting a figure with them marked to you today. The PDF file (1502765 (TetraTech) Olympic Antifreeze Feb 2015.pdf) should have everything your looking for as far as sample results go. They included the wrong chains with the results so ignore the chains when you looking at the results.

Dear Matt,
Analytical results for your samples we received on 2/19/15 are attached. This e-report is complete and no hardcopy report will follow. **The Level IV data package will follow in about 2 weeks.** An electronic invoice has also been included with this email. All results and invoices can be reviewed on our WebTrieve website which can be accessed directly from our website at www.alsglobal.com. Please call me if you would like to be registered for WebTrieve, or if you have any questions.

Regards,

Ann

ANNOUNCEMENT: In order to better serve you, improvements to Webtrieve™ are coming soon!
